

CONNECTING TO OPEN WI-FI NETWORKS

- Open Wi-Fi networks are networks that can be found in public spaces that anyone can have access to for free.
 - Examples of public Wi-Fi: libraries, internet cafes, school campuses, subways and buses, coffee shops
 - When using public Wi-Fi **make sure you connect to the correct network.**
 - If you are not sure which network is the correct one to connect to, **ask a worker for the name of the network**
- Tap on the Settings icon  and then tap on Wi-Fi  to go to the Wi-Fi screen.
- Check to make sure that your Wi-Fi is on.
 - The switch will be green, and you will see a list of available networks.
- Your device will automatically search for available networks.
- Tap on the name of the network you want to connect to.
 - When you successfully join a network, you should see a  next to the network name and  in the upper-left side of your display.
 - The name of the network will also move from the available networks list and appear under where it says Wi-Fi.

WARNING! WARNING! WARNING!

CONNECTING TO AN UNFAMILIAR AND UNKNOWN WI-FI NETWORK CAN LEAVE YOUR DEVICE AND YOUR DEVICE'S DATA AT RISK.

PROCEED WITH CAUTION WHENEVER CONNECTING TO ANY NETWORK.

CONNECTING TO A SECURE WI-FI NETWORK

- A secure network is one where you will need to enter a password in order to connect to it.
 - The password gives the owner of that Wi-Fi control over who connects to their network.
- Tap on the Settings icon  and then tap on Wi-Fi  to go to the Wi-Fi screen.
- Check to make sure that your Wi-Fi is on.
 - The switch will be green, and you will see a list of available networks.
- Your device will automatically search for available networks.
- As you look at the list of available networks you will notice that some of them have a lock symbol  next to the network name.
 - The lock symbol means that those networks will require you to enter a password in order to connect.
- Tap on the name of the network you want to connect to.
 - On the next screen you will be asked to enter the password for that network.
 - After typing in the password, tap on “Join”.
 - Your iPhone will begin connecting to that network.
- When you successfully join a network, you should see a  next to the network name and  in the upper-left side of your display.
 - The name of the network will also move from the available networks list and appear under where it says Wi-Fi.
